### Education

**Universidad de los Andes**

Bogotá, Colombia

Systems and Computer Engineering

August 2015 –October 2020 (Expected Graduation Date)

GPA 3.91/5.0

#### Relevant Coursework:

- Data Structures
- Architecture and Software Design
- Web Development

### Technical Skills

- Programming Languages: Java, JavaScript, C#, SQL
- Web development: HTML, CSS, React, Node, Meteor
- REST Architecture
- Data Structures and Algorithm Design
- Business architecture
- Communications and computer infrastructure

### Accomplishments

**Web Development project 1:** Programmed a website with a partner that helps people finding transportation to work by offering carpooling services. The project was written in JavaScript and HTML. The frameworks we used were React and Meteor.

**Web Development project 2:** Constructed a website with a partner which let artists look for people interested in working as a team in artworks. The project was written in JavaScript and HTML. The frameworks we used were React and Meteor. We used LinkedIn's API for the user's registrations.

**Mid-career project:** Built an Android application with a team which had the purpose of helping teachers plan their classes depending of what type of students they had. The students' classifications were based on Gardner's Multiple Intelligences. The project was done using Android Studio.

### **Additional Information**

**Languages:** Fluent in English and Spanish. Basic knowledge in Japanese.

**Scholarships:** I have my university's scholarship called *Quiero Estudiar Escala* where they lend me 95% of the career's price.

**Volunteer:** I was teacher of low-income students in their preparation for the National High School Exam (Prueba Saber 11)

**Interests:** Martial arts, foreign languages, cooking, and video games
